Ahmed Mohamed Sobhy

Giza,Egypt | +20 01020961705 | ahmedmohamedsobhy9@gmail.com | LinkedIn | Github

Objective

Motivated Front-End Developer and UI Designer with hands-on experience in modern Web design, building responsive, scalable, and pixel-perfect web applications using React.js, JavaScript (ES6+), and CSS3. Focuses on delivering an optimized User experience (UX) and combining technical front-end development with graphic design expertise to create clean digital solutions.

Education

Bachelor of Science in Management Information Systems, Modern Academy in Maadi Oct 2023 – Present

Internships

Front End React Developer | Digital Egypt Pioneers Initiative (DEPI) Jul 2025 – Present

– Developed responsive user interfaces with a focus on web application Scalability using React.js, HTML5, and modern CSS.
– Handled DOM manipulation, client-side state, and integrated RESTful APIs for seamless Server-side data integration.
– Applied mobile-first and responsive Web design principles across diverse device viewports.
– Enhanced overall User experience and collaborated on clean code implementation following OOP concepts.

Graphic Design | IT Gate Academy Jul 2025 – Present

– Designed promotional materials, social media graphics, and banners using Adobe Photoshop and Illustrator.
– Enhanced visual assets, ensuring brand consistency, high-resolution standards, and low-angle/perspective compositions.
– Translated graphic concepts into ready-to-code UI components for front-end integration.

Projects

Team Portfolio and University Guide Website Oct 2024 – Nov 2024

– Developed a responsive web application to introduce team members and showcase their skills and collective projects.
– Integrated dedicated sections highlighting university information, academic details, and interactive location details.
– Structured responsive page layouts and UI components using HTML, CSS, and JavaScript.

Revora Store – Automotive Showcase Web Application (Depi Project) Aug 2026 - Sep2026

– Designed and built a multi-page luxury car showcase web application featuring Audi R8, BMW, and Porsche models.
– Structured dynamic layouts using HTML5, CSS3, JavaScript (ES6+), and basic Jquery with focus on cross-browser compatibility.
– Applied mobile-responsive design standards (Smartphones and Desktops), optimized User experience, and basic SEO best practices
